MimED2026 Questions and Answers | *The *questions have not been intervened in the way they are written; simply translated into English.*

Q1. Can only students participate in MimED2026, or can graduates participate as well?

A1. *Graduates may also participate with projects they produced before graduating. The competition covers only projects produced in architectural design studios during the '2025-2026 fall' and '2025-2026 spring' semesters, as well as the '2025-2026 summer' semester held as a summer school at some universities. Graduation, diploma and final-semester projects are not eligible for the Fourth Year category.*

Q2a. I am planning to participate in the MimED2026 Architecture Students' Project Awards. The architectural design, plans, sections and three-dimensional model of the project I will submit were prepared by me. However, AI-assisted image generation tools were used for some of the architectural visualizations (renders) on the project sheets.

Is the use of AI-assisted architectural visualizations permitted in the competition?

Q2b. If they are used, is it mandatory to indicate on the sheets that these images were produced with AI assistance?

Q2c. Will the use of AI-assisted visualizations lead to any restriction in the evaluation process or to the project's disqualification?

A2. *If AI-assisted tools are used, this must be indicated beneath the relevant image. The student bears full responsibility for the academic integrity and originality of all content produced. In addition, the project must have been produced in an architectural design studio in the relevant semester and must be approved by the studio instructor.*

Q3. Hello is participation in the mimed 2026 architecture project competition only for students or can graduates participate with their past projects?

A3. *Graduates may also participate with projects they produced before graduating. The competition covers only projects produced in architectural design studios during the '2025-2026 fall' and '2025-2026 spring' semesters, as well as the '2025-2026 summer' semester held as a summer school at some universities. Projects from previous academic years are not eligible. Graduation, diploma and final-semester projects are not eligible for the Fourth Year category.*

Q4. In line with my interest in the MimED 2026 Architectural Project Competition, I would like to receive information about the conditions of participation, the application steps and the important dates. I would appreciate it if you could share with me the steps to be followed and the required documents (if any) so that the registration process can be completed in full.

A4. *Applications are made by registering on www.mimedprojects.com and uploading the project. The uploaded project is sent to the studio instructor for approval. Following approval, registration is completed by paying the participation fee. The deadline for digital registration and project uploads is 9 November 2026, and the deadline for studio instructor approval and payment of the participation fee is 11 November 2026. The conditions of participation are set out in Article 3 of the competition brief, and the competition schedule in Article 5. Digital registration and the sheet format are described in Articles 8 and 9, printed submission in Article 10, and the participation fee in Article 11. For further details, please consult the competition brief available at www.mimed.org.tr.*
